

Summary

I'm a software engineer with **10+** years of experience working in research and commercial contexts of both large and small companies. I build useful software by developing functional and correct components, assembling them, releasing early. Experienced with modern front-end software design as well as user interface and server side development.

Education

Kyiv Polytechnic Institute, NTUU "KPI"
Software Engineer (Bachelor Degree)

2005-2010

Experience

People.ai, Kiev, Ukraine
Senior Front-End Developer

2017

Dukascopy Bank SA, Kiev, Ukraine
Front-End Developer

2015 - 2016

Kaushan Media, Kiev, Ukraine
Front-End Developer

2014

Technical Expertise

Big fan of different topics of computer science, research and development, inventing and implementing algorithms for different programming languages and patterns from GOF to whole paradigms, data storage and data formats implementations, network protocols, etc. Most comfortable development process for me is Test Driven in tandem with Scrum environment. Familiar with Banking, Game, eCommerce, Mobile industry and more. Currently, I prefer following programming languages: JavaScript, ES5, sometimes ES6, C/C++, mostly SUS than POSIX, Java with some stuff from Spring Framework, Shell scripting.
