Summary

I'm a software engineer with **10+** years of experience working in research and commercial conexts of both large and small companies. I build useful software by developing functional and correct components, assembling them, releasing early. Experienced with modern front-end software design as well as user interface and server side development.

Education

Kyiv Polytechnic Institute, NTUU "KPI"
Software Engineer (Bachelor Degree)   2005-2010

Experience

People.ai, Kiev, Ukraine
Senior Front-End Developer   2017

Dukascopy Bank SA, Kiev, Ukraine
Front-End Developer   2015 - 2016

Kaushan Media, Kiev, Ukraine
Front-End Developer   2014

Technical

Familar with Banking, Game, eCommerce, Mobile, SmartTV applications development. Most comfortable development process for me is Test Driven in tandem with Scrum environment. Leading team, code review and refactoring. I prefer JavaScript, ES5, sometimes ES6, client side and nodejs. Deep knowledge of Linux administration, shell scripting, vcs, mostly GIT, VIM addicted user.

I work with: Ember.js, Angular.js, Backbone.js, React/Redux, Riot. Unit, Integration testing tools. Build tools, Continuous Integration systems. Experienced with general CSS frameworks, degradation strategies as well with material and mobile web design principles.

Authored

Chkservice packages.debian.org/sid/chkservice
GUI for systemd units configuration   C/C++, s/DBUS, Ncurses

Unstuck-Webpack stuck.js.org
GUI tool for webpack configuration   JavaScript, React, Material

CakeJS2 for SmartTV applications npmjs.com/package/cakejs2-spatial
React+Ember like framework   JavaScript, SmartTV
with spatial navigation ready virtual-dom implementation
